Family Owned  
for  
**55 YEARS**

## PRESIDENT'S MESSAGE

# Leggett, Inc. – the Pride of Home Comfort

I'm so proud of Leggett, Inc., our local, family owned team that is celebrating 55 years of customer service to the greater Harrisburg area. We have been blessed to have such a loyal, hard-working group of individuals that our customers can rely on for all of their home comfort needs.

Our expert customer service team does a great job listening to our customers and their needs, and our NATE-certified field technicians provide reliable and professional services directly to our customers. That's why I make it a point to let them know how great a job they're doing, and that they're making a big impact on our community with their hard work and dedication. You, too, can trust our team to be your advocate and to guide you in the right direction when it comes to the HVAC, Plumbing, and Electrical systems in your home or office.

If it weren't for our team of employees and our strong network of supplier partnerships, we wouldn't have been able to be there for you when you needed us most.

We also want to thank every one of our customers for turning to the Experts at Leggett, Inc. for home and office comfort system maintenance, repairs, and improvements. We trust that you are satisfied with our customized solutions, made especially for you, to protect what matters most: you, your family, your home and your employees and their work environment.

Always make the Sure Call to Leggett, Inc. at 717-737-4562 for all of your Heating, Cooling, Plumbing and Electrical needs. And keep us in mind for your indoor air quality solutions as well! We've been selling and installing RFG products, such as the REME HALO air purification system for more than 10 years!

Sincerely yours,

*Ernie*

## Water Heating & Treating from Leggett, Inc.

As home utilities go, water is something we couldn't live without! That's why the plumbers at Leggett, Inc. are such an important part of our team, and also why you can get all of your water heating and water treatment solutions right here with us!

### Water Heating

Hot water is a year-round necessity! We sell, install and maintain modern water heaters that boast high efficiency ratings in both styles, reservoir and tankless. Whether you're looking for an upgrade or just some repairs to help your current water heating system last longer, give us a call.

### Water Treatment

Hard water is a common problem for our area, but not to worry! We sell and install a host of water quality treatment products and solutions that include whole-house water filtration systems and water softeners. You and your family deserve safe drinking water – even right from the tap!

Talk to a Leggett, Inc. plumber today! We'll help you find the right water heating and water treatment solutions for your particular needs.

## Myth Busters, HVAC Edition

When it comes to home heating and cooling, you may have some misconceptions about how to properly utilize a thermostat, or how to find the right heating and cooling equipment for your home. Let's put some myths to bed in order to help clear things up!

**MYTH: Turning the thermostat all the way up or down will heat or cool your home faster.**

Not true! By cranking your heating or cooling system, all you're doing is putting more strain on the equipment. Additionally, you'll be dealing with undesirable indoor temperatures and wasted energy.

**MYTH: Purchasing the largest heating or cooling equipment is the most effective way to stay comfy.**

When shopping around for heating and cooling equipment, sizing is very important. However, you won't get the most bang for your buck by buying the biggest piece of equipment available. Let us help you find the right-sized equipment for your home!

**MYTH: Shutting off your heating and cooling systems when going away is the best practice.**

This is not always the case. Severe weather conditions - extreme heat or cold - can prove to be problematic for an unoccupied home. Frozen pipes and water damage are common issues during winter, and high levels of humidity in summer can damage homes as well.

**MYTH: Ceiling fans are only good for keeping cool in summer.**

You wouldn't necessarily know it since it's installed up on the ceiling, but there's a switch that allows you to change the direction of your ceiling fan so it can help you stay comfortable in both summer and winter months! Counterclockwise to push cool air down for the summer and clockwise to pull cool air up for the winter.

*Can you think of any heating or cooling myths you've come across that you'd like busted open? Let us know! Give us a call or contact us online to share your myths, and we might include them in our next newsletter.*

# Is Your AC Struggling to Keep Up?

**Just how confident are you in your air conditioning system's ability to make it through the summer? Don't assume everything's fine – keep an eye out for these signs that you may need to repair or replace your air conditioning equipment to save your summer comfort!**

## Aging System

Has your AC seen decades of use? It might be in your best interest to upgrade it! Modern equipment tends to last longer than older systems and utilize advanced technology to improve the comfort levels within the home.

## Cooling Costs

Are you noticing a sudden spike in utility costs when you're running your air conditioning system? Over time, equipment efficiency can degrade, resulting in an uptick in cooling costs. If the equipment is relatively new, keeping up with regular maintenance should help improve the efficiency. Otherwise, an upgrade is a surefire way to lower cooling costs!

## Weak Airflow

Having a hard time feeling the cool air coming from the vents? It could be dirty filters or an issue with the AC blower. Either way, this is another issue that can be solved simply by scheduling annual tune-ups and keeping the system well maintained.

## Poor Air Quality

Air conditioning systems aren't just about keeping you cool - they help with air filtration and humidity control as well! If you're having a hard time escaping from the humidity of summer no matter how long you run your AC, consider upgrading and enjoying modern cooling equipment with state-of-the-art humidity control technology.

No matter what problems you're having with your air conditioning system, the solutions are only a phone call away! Give us a call for all of your home cooling needs this summer.

# It's the Time of the Season for... **Better Indoor Air Quality**

Between a year-long pandemic and the return of the allergy season, the quality of air inside the home has never been more important. And while it's easy to scrub every surface, keeping the air clean can be a bit trickier. That's where our indoor air quality solutions come in to help with...

## **Cleaner Air**

Equipped with specialty filters, air cleaners work to keep many contaminants and particulates out of the home. This can include allergens such as pollen and pet dander as well as irritants like smoke odor. These systems can even help fight against germs, viruses and bacteria, helping to keep your family healthy.

## **Humidity Balance**

Too much or too little moisture in the air isn't good for your comfort. In order to properly balance the humidity levels in your home, whole-home humidifiers and dehumidifiers can be leveraged to provide a comfortable space without stressing your heating or cooling system.

## **Germ, Bacteria & Virus Removal**

UV Lights are installed within an HVAC system, where they eliminate germs, bacteria, viruses and more, before they have a chance to circulate back into the home with the conditioned air.

## **Fresh Air**

These days homes are sealed up so tightly that they keep fresh air out, especially when windows stay closed most of the year while heating and cooling systems are running. Your indoor air can get stale – but whole home ventilation systems bring a breath of fresh air without affecting the temperature.

There are a lot of ways to keep the air in your home clean, fresh and safe - but you don't have to worry! Call or contact us online today to learn more about our indoor air quality solutions and how they can help you and your family breathe easily.

# How to Cope With the Stress of Quarantine

These are stressful times – how well are you coping with them? Your mental health is just as important as your physical health in any situation, so let's review the CDC's recommendations on how to deal with the stress of quarantine.

- Take breaks from watching, reading or listening to the news. This includes social media! It's great to stay informed, but step away if you feel like it's starting to impact your mood.
- Take care of your body by eating healthy foods, exercising regularly, getting plenty of sleep and avoiding excessive alcohol and tobacco use.
- Find time to do things you enjoy. Pick up a new hobby or revisit an old one.
- Open up about your concerns and feelings with people you trust. Keeping feelings bottled up will only increase anxiety and stress.

## Know the signs of stress!

How do you know if stress is affecting you? Look out for the following signs, and take the measures above if you begin to notice any of these symptoms popping up:

- Feelings of fear, anger, sadness, worry, numbness or frustration
- Changes in appetite, energy, desires and interests
- Difficulty concentrating and making decisions
- Difficulty sleeping or nightmares
- Headaches, body pains, stomach problems
- Worsening chronic health problems
- Worsening of mental health conditions

It's natural to feel stress during a time as stressful as the COVID-19 pandemic. If you'd like to learn more about coping skills, visit [CDC.gov](https://www.cdc.gov).

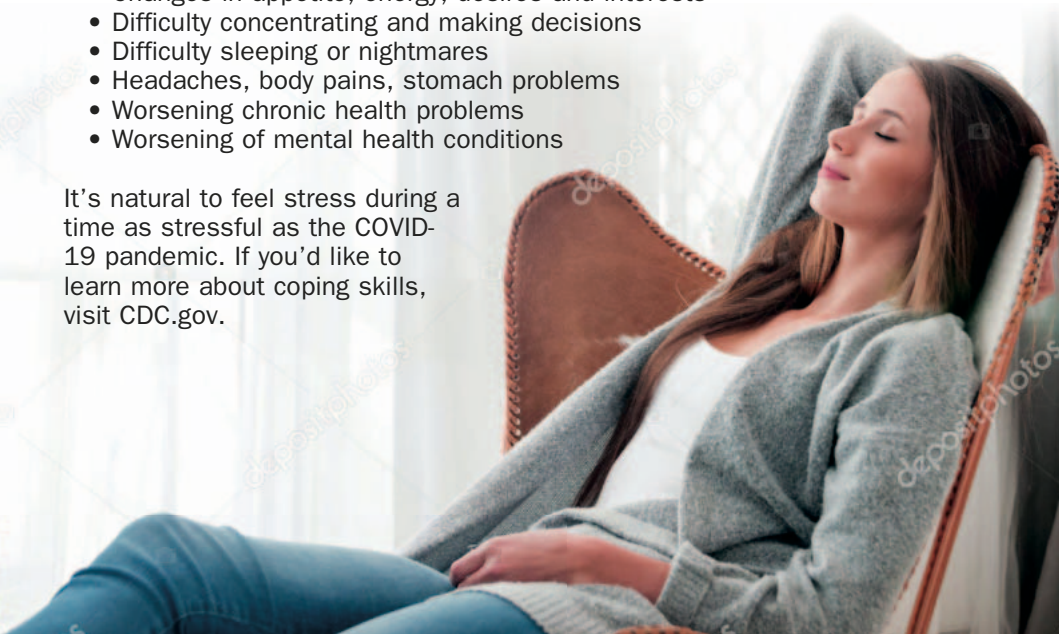

## Not Just a Job – A Career

Are you looking for a career that will leave you feeling accomplished at the end of each day? Enjoy working with your hands? Looking to learn a new, useful skill? Consider becoming an HVAC technician.

Over the next decade, it has been estimated that there will be a shortage of about 400,000 HVAC technicians – so now is the perfect opportunity to consider a career change! Join the industry and enjoy competitive salaries, benefits, job security and much, much more.

Give us a call to learn more about applying for a position as an HVAC technician!

## COVID-19's Effect on Supply Chains

We all recall at the beginning of the pandemic when we couldn't get our hands on toilet paper, paper towels and other cleaning supplies. Even today, some stores are still struggling to get and keep these products on their shelves.

Believe it or not, HVAC equipment is going through a similar trend due to the pandemic! Equipment shortages are a real issue, but we're doing all that we can to ensure our customers' home comfort needs are being met. With that in mind, we encourage you to call now if you need to purchase any equipment, accessories or supplies, to make sure you can get what you need in a timely manner.

**Don't wait! Give us a call today for all of your heating and air conditioning equipment needs.**
